CRUISE 115 Elegance Freeline Silver

The Freeline 115 by Isotherm represents an evolution of the Elegance line designed for both for the Marine & Recreational Vehicle market. The Freeline 115 features a spacious cabinet comprised of an 83 liter fridge and a 32 liter freezer compartment which allows for storage of extra frozen goods. Unique design allows this large fridge to fit in limited spaces such as fitting the hull curve on most boats.

Characterized by superior cooling performance, the Freeline 115 also excels at energy efficiency. An integrated control panel allows you to select maximum cooling or ECO Mode for economical operation and minimum battery consumption. The Freeline 115 control panel allows easy control of fridge functions such as temperature setting and internal lighting while providing simple system diagnosis.

Your Advantages:

- Volume: 115 liters
- Silent, high efficiency, fan cooled 12/24V Danfoss compressor
- Control panel that includes ECO function
- Wide freezer compartment
