Isotherm Cruise 260 COMBI Stainless Steel (INOX) - X-Large Fridge/Freezer

The Isotherm Cruise 260 COMBI brings large refrigerator storage to the marine market by combining the proven performance of the Isotherm 130 DRINK mounted over the Isotherm 130 Drawer as a single unit. This combination provides extra refrigeration storage for those who need minimal freezer space. A four gallon internal freezer in the lower drawer fridge provides ample space for ice and other frozen goods while allowing for maximum storage of refrigerated supplies.

Thanks to the modular concept of the COMBI line, different combinations can be accomplished, based on an elegant stainless steel flush frame that joins together proven refrigerators and freezers in a single unit for large volume storage. Interesting hybrid mix are now possible by combining front door opening fridges over convenient drawer units
