This LED navigation light consists of two individual lights;

A Tricolor with three high-power LED that produces light in the specified angle utilizing special designed PMMA light guides, and an Anchor light with a single array of LEDs that produces light in the specified angle. Each light can be activated separately.

The top of the light features a mounting adaptor for a Windex. The adaptor has a built-in LED that lights up the Windex for easier observation. The Windex adaptor has an LED for illumination of the Windex that automatically switches on when the Tricolor light.

The precision machined 6082 aluminium housing with an anodized surface makes the light a rugged and durable housing for the LEDs and electronics contained within.

The interior is completely filled with a special potting resin making it water- and vibration proof.

Produced in our in-house manufacturing facility to meet and exceed exacting standards such as EN14744 and UL1104, under a quality management system continuously surveyed by Lloyds Register Quality Assurance.

Each light is subjected to final testing for a minimum of 16 hours of continuous operation bringing the total test time beyond 24 hours.

This navigation light is in compliance with the following standards:

- COLREG72
- EN14744
- IEC 60945
- USCG (UL1104)

Together with an appropriate Control & Monitoring System, such as Lopolight's own NLC* this navigation light can form part of an IMO MSC 253(83), LY3 and LY4 compliant system.
