

24,000 BTU System

24,000 BTU System
M24

Newest to the Mermaid Manufacturing line is the M24 - 24,000 BTU Cool Only and Cool/Reverse Cycle model marine air conditioners. Due to our customers demands, the M24 was created to solve the problem of locating a self-contained unit where performance, price, and efficiency were hard to find with an output larger than 16,500 BTU's.

Constructed on Mermaid's standard 304-18awg stainless steel base with dual condensate drains, the M24 is an ideal addition to any vessel looking for maximum performance and durability - all in one

package. This self contained system produces over 24,000 BTU's in Cooling and over 28,000 BTU's while in the Reverse Cycle Heat mode. The M24 is available in Right and Top air discharge configurations and only comes in 220v. The air output collar holds an eight inch duct. It is recommended to use at least three vents on this unit - minimum sizes of 6 inch vents. As always, the more vents the better. We are able to provide eight inch ducting and air splitters to take eight inch to multiple six inch vents.

On average, this unit is designed to cool cruisers over 40' and sailboats over 45'.

All M24's come with a digital thermostat of your choice (see below), air output collars, remote mount electrical boxes, and a five-year warranty.

Price \$3,030.00

Air conditioning for yachts over 40'

Running amperage:

- Cool = 10.4, Reverse Cycle = 11.4
- Add approximately one amp for the standard seawater pump (220v)
- Start up amperage is calculated by running amperage multiplied by 1.8

Dimensions:

- L-23" W-18" H-16.75"
- 92 Lbs
